## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3, 16-18, and 20-22, drawn to an apparatus for compensating differential picture brightness of an optical image, classified in class 348, subclass 65.
  - II. Claims 24-26, drawn to a medical imaging system, classified in class 348, subclass 68.
  - III. Claims 35-37, drawn to an endoscope, classified in class 600, subclass 101.
  - IV. Claims 38-44, drawn to an endoscope for imaging a target site, classified in class 348, subclass 65.
  - V. Claims 45-47, drawn to a video signal compensator for an endoscope, classified in class 348, subclass 69.
  - VI. Claims 48-96, drawn to a medical instrument for use in imaging a target site in a medical procedure, classified in class 600, subclass 160.
  - VII. Claims 97-102, drawn to a medical system for use in imaging a target site in a medical procedure, the target image having an energy profile, classified in class 348, subclass 162.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-VII are related as combination and subcombination. Inventions in this

Art Unit: 2613

relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because differential picture brightness compensation does not require the particulars of a medical imaging system. The subcombination has separate utility such as medical and dental applications.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV, V, VI, and VII, or vice versa, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 2613

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. Lee whose telephone number is (703) 308-7584.
